Alice Cabinetry

ABOUT US

Who are we

ALICE CABINETRY is a select, quality-stock, eco-friendly and ready-to-assemble cabinetry wholesaler and distributor in North America.

Our product, sold through a partner network of contractors, retailers, designers and builders, features low VOC Sherwin-Williams waterborne UV finishes, factory pre-assembled dovetail drawers, patented solid wood dovetail tenons, soft closing glides and other great features.

It is our on-going mission to bring promises to the homeowners and our partners, both on the quality, functionality, the cost of the product and the code of service.

Our Mission

Use our products and services to deliver a form of energy that is warm and promising, one home, one cabinetry and one city at a time.

Our Vision

With our Partners, products, and customers, by 2025, we will turning 500,000 people's dreams of home into a reality.

Our value

A - Accepting

Accepting what is, rather than wishing for what is not help us experience life more deeply and at peace; Acceptance of our faults helps us grow patience, develop trust and celebrate strength.

L - Loving

In all that we do, let us do it for love!

I - Inspiring

Inspire and give back on a daily basis, providing blueprints to mentoring.

C - Citizenship

Be involved and play an active part in the society, while always remembering the responsibilities we've been given.

E - Encouraging

Be supportive, spread hope and confidence to others and to yourself.

Our CERTIFICATION

California Air Resources Board

Alice Cabinetry products meet the California Air Resources Board's current standards for certification. CARB2 labeling indicating compliance is on each box and product. The California Air Resources Board regulates air quality by ensuring that materials and air emissions meet the most stringent requirements. For more information, please feel free to email sales@alicecabinetry.com or visit arb.ca.gov.

GREENGUARD Certification

All the Alice Cabinetry products are certified by the GREENGUARD Certification Program. That means Alice Cabinetry gives assurance that products designed for use in indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors.

National Kitchen & Bath Association

Alice Cabinetry is a member at the National Kitchen & Bath Association. Being part of this association keeps us informed with the latest news and developments in the industry. For more information, please feel free to contact our offices or visit www.nkba.org.

Our TECHNOLOGY

Water-based paint technology

Around Sep. 2011, we improved existing paint processes and adopted water-base environment-friendly paint. The environmental characteristics of water-base paint are well known within the industry. New water-base paint technology that provides excellent decorative and protective properties. Since it is composing 70-90% water, which is human and environmentally friendly and contains no harmful substances, such as organic solvent, methanal, benzene, dimethylbenzene, heavy metal, etc. Thus it is extensively favored by people instead of traditional paint. Water-base environment-friendly paint is odorless, non-pungent, non-toxic and environment-friendly, free of benzene and other harmful solvents or free TDI (toluene diisocyanate). (No dimethylbenzene-benzene-methanal and other specified 14 harmful substances shall be used during production) Work environment in the workshop of the company shall reach the leading level of furniture enterprises.

Kitchen PLANNING

5 Standard Kitchen Layouts

There are five fundamental layouts for most kitchens - the single-wall, L, G, U, and galley. While certain floor plans create a more spacious, efficient kitchen, each kitchen layout can be enhanced with the right cabinetry and decorative accents. Depending on the overall size of your kitchen, an island can be added to many of these layouts to expand storage and create additional counter space. The width of walkways between cabinetry and the island is important and your kitchen designer will help determine if you have enough space to accommodate an island. Islands can be created in all shapes and sizes and you are not limited to a standard square or rectangular shape.

ONE WALL

The **Single-wall** kitchen floor plan is ideal for smaller homes. The work triangle in this kitchen layout is less like a triangle and more of a work line with all three kitchen zones along one wall. It offers the least efficient kitchen plan but maximizes space.

L-SHAPE

In an **L-shaped** kitchen layout, a natural work triangle is created from continuous counter space and work stations on two adjacent walls. The benefit of this kitchen floor plan is that it not only provides the cook with an efficient work area, but it typically opens to a nearby room, making it easy for the cook to interact with guests.

GALLEY

With a **Galley** floor plan, the work stations face each other on parallel walls, creating a small work triangle. How to enhance the Galley kitchen: Similar to the one-wall kitchen floor plan, stack storage solutions to maximize space. Add a pass-through or remove a wall to open the kitchen, but still allow for base cabinetry and countertop space.

U-SHAPE

The **U-shaped** kitchen is the most versatile layout for kitchens, because the layout offers continuous countertops and ample storage, which surround the cook on three sides. How to enhance the U-shaped kitchen layout: To maximize storage and keep countertops clutter free, conceal the microwave in a base or wall cabinet and store large cooking essentials in a lazy susan.

G-SHAPE

The **G-shaped** kitchen is a step up from the U-Shape kitchen. This design adds extra cabinet and counter space. How to enhance the G-shaped kitchen layout: Depending on the size of the kitchen, G-shaped kitchens can seem cramped. To make the room feel more spacious, open up the wall in a nearby room and create a pass-through or breakfast bar for the family.
